DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. Furthermore, under PCT Rule 13.2 the requirement of unity of invention referred to in PCT Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a method for inducing the activity of an RNAi in cells in which the TAT protein and a nucleic acid coding for the sense and antisense sequences are separated by a TAR sequence wherein a RNA is transcribed that forms a complex with TAT and induces RNAi.

Group II, claim(s) 12-14, drawn to a nucleic acid coding for sense and antisense sequences separated by a TAR sequence.

The inventions listed as Group I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

Art Unit: 1635

corresponding special technical feature for the following reason: the special technical feature of groups I-II is a nucleic acid sequence coding for a sense and antisense strand separated by a TAR sequence. The nucleic acid agent cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. Michienzi et al. teach a nucleic acid sequence coding for a sense and antisense strand separated by a TAR sequence (see Figure 1 page 14047). The reference also teaches cells comprising said nucleic acid sequence.

Because the special technical feature is shown in the prior art, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
